GitHub: github.com/otty98

Portfolio: otty98.github.io/ai-bootcamp-portfolio

Full-stack software developer with hands-on experience in TypeScript, Python, Java, C#, Angular, and .NET. Strong background in building scalable enterprise applications, microservices architecture, and automated testing. AI bootcamp graduate with practical skills in generative AI, machine learning, and AI-powered application development. Proven experience working on production systems for AudioMind, MN Risk Services, and City of Johannesburg Asset Management Application. WeThinkCode_ graduate and CAPACITI trainee with expertise in Agile methodologies, version control, and cross-functional collaboration. Committed to writing clean, efficient, maintainable code and driving AI adoption in organizational workflows.

TECHNICAL SKILLS

Programming Languages:

TypeScript, Python, Java, C#

Frontend Development:

Angular, HTML, CSS, Responsive Web Design

Backend & Frameworks:

.NET, SignalR, REST APIs, Microservices Architecture

Databases:

MySQL, PostgreSQL

AI & Machine Learning:

Generative AI, LLM-powered Applications, ChatGPT Integration, AI Ethics, ML Fundamentals

Testing & Quality Assurance:

Automated Testing, Selenium WebDriver, Gauge, Unit Testing

DevOps & Tools:

Git, GitHub, Docker, GitHub Actions, CI/CD, Agile/Scrum Methodologies

System Architecture:

Distributed Systems, API Integration, Authentication Flows, Network Programming

PROFESSIONAL EXPERIENCE

Full-Stack Software Developer

Tiye Technologies | Johannesburg, South Africa

September 2025 – Present

- Design, develop, and deploy enterprise applications using Angular and .NET for frontend and backend systems
- Build and consume microservices, collaborating with cross-functional teams on scalable backend architecture

- Contribute to production-level applications using MySQL and PostgreSQL databases
- Implement API integrations, authentication flows, and reusable component libraries
- Participate in Agile ceremonies, code reviews, and version control workflows using Git
- Write clean, maintainable, well-documented code following team standards and best practices
- Troubleshoot and debug technical issues, providing timely solutions for system enhancements

Digital Associate - Software Development Program

CAPACITI | Johannesburg, South Africa

March 2025 – August 2025

- Completed 2-month AI Bootcamp: Built chatbots, ethical AI prototypes, and LLM-powered applications
- Completed 4-month Software Development Stream specializing in web development and REST APIs
- Developed full-stack projects with system integration and database management
- Applied Agile methodologies, participating in sprints, stand-ups, and retrospectives
- Collaborated with teams to gather requirements and translate them into technical solutions

EDUCATION

Diploma in Software Engineering

WeThinkCode_ | Johannesburg, South Africa

2022 – 2024 (Graduated)

- Developed Google Calendar-integrated Code Clinics System using Python and API integration
- Built multiplayer network game using Java sockets, concurrency, and MySQL database ([GitHub](#))
- Gained hands-on experience in Distributed Systems, Agile methodologies, and DevOps practices
- Implemented automated testing frameworks using Selenium WebDriver and Gauge ([GitHub](#))
- Utilized Docker and GitHub Actions for continuous integration and deployment

Matriculation Certificate (High School Diploma)

Dansa International College

2017

KEY PROJECTS

AI-Powered Applications & Chatbots

CAPACITI AI Bootcamp | 2025

- Developed generative AI prototypes and LLM-powered applications
- Implemented ethical AI principles in application design and deployment
- Created interactive chatbots with natural language processing capabilities

SOFT SKILLS

- Strong Communication & Active Listening
- Problem-Solving & Analytical Thinking
