[Portfolio](#)

Full-stack developer with hands-on experience in **JavaScript/TypeScript, Node.js (Express & NestJS), .NET (SignalR), Angular**, and microservices architecture. Strong background in Java, Python and Automated Testing, with a solid foundation in building scalable backend systems and integrating complex frontend flows. A WeThinkCode_ graduate and CAPACITI trainee with real world projects experience working on production systems, including well-known platforms like **AudioMind, MN Risk Services** and the **City of Johannesburg (COJ) Asset Management Application**. Adaptable, fast-learning, and committed to writing clean, efficient and testable code.

Experience

Full-stack Developer

Tiye Technologies | Johannesburg

September 2025 – PRESENT

- Working as a full-stack developer, building both frontend and backend features and integrating full workflow
- Building enterprise applications using Angular for frontend and NestJS / .NET for backend depending on project requirements
- Developing and consuming microservices, collaborating with teams on scalable backend architecture
- Contributing to production-level applications using MySQL & PostgreSQL
- Participating in code reviews, version control workflows, and Agile ceremonies
- Implementing API integrations, authentication flows and reusable components

Digital Associate (Software Development Program)

CAPACITI | Johannesburg

March – August 2025 (6-month program)

- **2-month AI Bootcamp:** built chatbots, ethical AI prototypes and LLM-powered applications
- **4-month Software Development Stream** using Node.js (Express), React, and REST APIs
- Full stack project development and system integration
- Working in sprints and following Agile methodologies

Education

WeThinkCode_ – Software Engineering

2022 – 2024 (Graduated 2024)

- Developed a Google Calendar-integrated **Code Clinics System** (Python)
- Built a multiplayer network game using **Java sockets** and **concurrency & MySQL db** - [GitHub Link](#)
- Experienced with **Distributed Systems, Agile & DevOps** (GitHub actions, Docker)
- Wrote Automated Tests using **Selenium WebDriver** and **Gauge** - [GitHub Link](#)

Dansa International College – Matric

2017

Soft Skills

- Communication & Active Listening
- Time Management
- Fast Learner and Adaptability
- Critical Thinking & Problem Solving
